Supervisor Mark Ridley-Thomas  
Supervisor Zev Yaroslavsky  
Supervisor Michael D. Antonovich

FROM: Wendy L. Watanabe  
Auditor-Controller

SUBJECT: **AUDIT OF THE LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
FOR THE YEAR ENDED JUNE 30, 2013**

Attached is the audit report on the financial statements of the Los Angeles County Flood Control District (District) for the fiscal year ended June 30, 2013 (Attachment I). The audit was conducted by an independent Certified Public Accounting firm, Moss, Levy & Hartzheim, LLP (Moss), under the Auditor-Controller's master agreement for audit services. Moss' auditor's communication letter and the report on internal control are also attached (Attachment II).

Moss' report on the financial statements indicates that they present fairly, in all material respects, the financial position of the District, in accordance with accounting principles generally accepted in the United States of America. Moss' report on internal control did not identify any control deficiencies over financial reporting that they consider to be material weaknesses.

Please call me if you have any questions, or your staff may contact Robert Smythe at (213) 253-0101.

### COMPREHENSIVE ANNUAL FINANCIAL REPORT OF THE LOS ANGELES COUNTY FLOOD CONTROL DISTRICT

We are pleased to submit the Comprehensive Annual Financial Report of the Los Angeles County Flood Control District (District) for the year ended June 30, 2013. The District is a blended component unit of the County of Los Angeles. The report contains financial statements prepared in accordance with Generally Accepted Accounting Principles (GAAP) for governmental entities and provides a comprehensive overview of the District's financial operations and financial position. The accuracy, completeness, and fairness of presentation of all information in this report are the responsibility of the District.

The Independent Auditor's Report is located at the front of the Financial Section of this report. Management's Discussion and Analysis (MD&A) immediately follows the Independent Auditor's Report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this transmittal letter and should be read in conjunction with it.

### LOS ANGELES COUNTY FLOOD CONTROL DISTRICT AND ITS SERVICES

The District was established in 1915 under the Los Angeles County Flood Control Act. The District's powers are exercised through your Board acting as the District's governing body. The District's mission is to provide for the control and conservation of the flood, storm, and other waste waters of the District; to conserve such waters for beneficial purposes and to protect the harbors, waterways, public highways and private property within the District from flood and stormwater damage.

Each Supervisor  
December 30, 2013  
Page 2

The District boundaries encompass approximately 2,752 square miles. The District operates and maintains one of the most complex systems of flood control and water conservation in the County. The District's current infrastructure includes 14 major dams, 483 miles of open channels, 2,953 miles of underground storm drain conduits, more than 80,000 catch basins, 61 pump plants, 155 sediment entrapment basins, 253 crib dams, 29 sediment placement sites, 27 spreading grounds, 21 low-flow diversion structures, 1 constructed wetland, and 3 seawater intrusion barriers consisting of 290 injection wells. The District's major programs are categorized as Flood Risk Management, Storm and Recycled Water Recharge, and Watershed Health. These programs are described as follows:

- **Flood Risk Management** - This program includes the planning, operation, maintenance, and rehabilitation of flood control facilities, emergency preparedness, storm response, floodplain management, regulatory compliance, and public education.
- **Storm and Recycled Water Recharge** - This program includes the planning, operation, maintenance, and rehabilitation of water conservation facilities, regulatory compliance, and public education.
- **Watershed Health** - This program includes the compliance activities of the District as mandated under the Los Angeles County National Pollution Discharge Elimination System (NPDES) Permit. The District's responsibilities include conducting special water quality studies, water quality monitoring of the District's channel system, enforcement of an illicit connection and discharge program, and working with municipalities to implement control measures to reduce urban and stormwater runoff pollution.

## ECONOMIC OVERVIEW

Population growth in the County will continue to increase demands on already limited water supplies. To address this demand, the District continues to look toward expanding water conservation programs and identifying more opportunities for stormwater capture, treatment, and recharge.

The District's revenue stream is primarily supported by benefit assessment and property taxes. The County's assessed property tax roll grew and was 2.2 percent higher in the current year.

Each Supervisor  
December 30, 2013  
Page 3

The District continues to seek grant opportunities to offset increasing costs, as well as partnerships and collaborative efforts with agencies and organizations to leverage resources. On November 7, 2006, voters approved California State Propositions 1E and 84, which allow the State to sell bonds for financing projects that will enhance flood protection and improve urban runoff and stormwater quality. To date, the Flood Control District won \$20 million in competitive grant funding from Proposition 1E for its Santa Anita Stormwater Flood Management and Seismic Strengthening Project which included five elements: Santa Anita Dam Seismic Remediation/Riser Modification, Santa Anita Dam Spillway Modification, Santa Anita Debris Dam Seismic Retrofit, Santa Anita Headworks Rehabilitation, and Santa Anita Spreading Ground Improvements. An additional \$28.4 million was awarded for the Devil's Gate and Eaton Stormwater Flood Management Project which includes Devil's Gate Reservoir Sediment Removal and Management Project, Devil's Gate Water Conservation Project, Eaton Wash Dam Rehabilitation Project, and Eaton Wash Spreading Grounds Improvements. The District also will receive Proposition 84 Grant Funds for Dominguez Westside Percolation Enhancements, Peck Pit Spreading Basin Improvement, Walnut Creek Spreading Basin Improvement, and Pacoima Spreading Grounds Improvement Projects for a total of over \$10 million. The City of Los Angeles Department of Water and Power (DWP) is providing funding in the amount of \$10 million each for Big Tujunga and Pacoima Reservoir sediment removal projects. The DWP is also providing funding of \$15 million for Pacoima Spreading Grounds Improvements and \$2 million for Lopez Spreading Grounds Improvements. Three Valleys Water District provided \$500,000 for the Live Oak Spreading Grounds Improvement Project supporting our ongoing interest and commitment to partner with local agencies to maximize water conservation and groundwater recharge benefits.

## **MAJOR INITIATIVES**

### **FUNDING**

In September 2010, the Governor of California signed into law AB 2554, an update to the Los Angeles County Flood Control Act, which provides the District with the authority to charge a clean water fee (subject to a proposition 218 vote) to pay for the cost of carrying out projects and providing services to improve water quality and reduce stormwater and urban runoff pollution. Revenue from the proposed fee would be allocated to three different programs: 10 percent to the District for water quality monitoring, planning/modeling, and administration including fee collection and certification/auditing; 40 percent to cities and County unincorporated areas to be used for those jurisdictions' water quality improvement programs; and 50 percent to Watershed Area Groups to implement collaborative regional programs at the sub-watershed level. Earlier this year this Board conducted a series of public hearings

Each Supervisor  
December 30, 2013  
Page 4

to receive testimony on the proposed Clean Water, Clean Beaches Measure. At the conclusion of the public hearing, your Board voted not to proceed with the Clean Water, Clean Beaches Measure at this time.

## FLOOD RISK MANAGEMENT

*Dam Rehabilitation Program* – The District has undertaken a program to upgrade its dams to meet current seismic and spillway requirements. The District has spent approximately \$158 million in construction costs for the Dam Rehabilitation Program since the 1994 Northridge Earthquake. Anticipated future construction projects under this program include Santa Anita Dam, Santa Anita Debris Dam, and Sawpit Debris Dam. As part of the Santa Anita Stormwater Flood Management and Seismic Strengthening Project, the District is planning \$40 million in modifications to existing facilities along Santa Anita Wash. These facilities include Santa Anita Dam, Santa Anita Debris Dam, Santa Anita Spreading Grounds, and Santa Anita Headworks. The District entered into a Proposition 1E Grant Agreement with the State Department of Water Resources for \$20 million in matching funds to complete these improvements. For Puddingstone Dam, the District initiated a \$1.1 million comprehensive dam safety evaluation project which will include a thorough geotechnical investigation and updated seismic stability analyses. At San Dimas Dam, a project to test the monitoring tendons and to perform updated seismic analysis was started using as-needed consultant services for a cost of \$370,000.

*Dams Inlet/Outlet Works Rehabilitation Program* – As the District's dams continue to age, many of the inlet/outlet works and ancillary components such as flood control valves used for releasing reservoir water are coming to the end of their useful lives and require major maintenance, repairs, and/or replacement. Since 2009, when the program was initiated, the District has completed or is now in the process of completing numerous inlet/outlet works projects totaling approximately \$35 million in construction costs. An additional \$40 million in inlet/outlet works rehabilitation projects is planned under this program over the next ten years.

*Security Action Plan for District's Major Dams* – The District started implementing physical infrastructure elements such as new hardened access gates and fencing, control house intrusion alarms, improved lighting, and other security features at select dams. These measures have been implemented at San Gabriel, Morris, and San Dimas Dams and are being implemented at Eaton Wash and Big Tujunga Dams. The estimated cost of this program is \$1.5 million over the next four years.

*Integrated Regional Water Management Plans (IRWMP)* – This program, initiated by the State Department of Water Resources, brings together agencies and organizations with

Each Supervisor  
December 30, 2013  
Page 5

water resource interests to collaboratively address the water resource challenges in the County and surrounding areas. This collaborative effort includes the District, cities, water purveyors, water wholesalers, groundwater managers, environmental organizations, open space stakeholders, stormwater managers, and representatives from disadvantaged communities.

Cooperative Projects with the Army Corps of Engineers – The District is currently involved in several project studies being sponsored and conducted by the Army Corps of Engineers. Project objectives include flood protection, water conservation, and stream restoration. The projects are spread throughout the District and listed below:

- Arroyo Seco Watershed Feasibility Study
- Ballona Creek Ecosystem Restoration Study
- Coyote Creek Feasibility Study
- Phase II Los Angeles County Drainage Area Stormwater Management Plan
- Santa Clara River Feasibility Study
- Sun Valley Watershed Feasibility Study
- Whittier Narrows Water Conservation Study

Federal Emergency Management Agency (FEMA)–National Levee Certification Program Compliance – The District has a program that certifies that District-owned levees meet Federal flood protection standards. The objective is to ensure that all levees are evaluated and certified, enabling FEMA to continue to show them as providing flood protection from a 100-year flood on their Flood Insurance Rate Maps. To date, approximately 56 miles of levees have been certified but are awaiting acceptance from FEMA. Improvement alternatives are also being developed for approximately 14 miles of levees that have not been certified.

Integrated Water Resource Planning – This program addresses flood protection and water conservation goals of the District in an integrated fashion. The goal of this program is to undertake projects that provide multiple benefits to the communities served by the District which include flood protection, water conservation, water quality, and community enhancements such as active and passive recreational facilities. Funding for projects that go beyond the District's purview is provided through multiple partners such as State conservancies and local, State, and Federal agencies.

Reservoir Sediment Removal – The District's 14 major dams and reservoirs are the backbone of the District's flood protection and water conservation network. The reservoirs also perform debris control due to their location in the San Gabriel Mountains, which are considered among the most erosive in the world. As a result of erosion,

Each Supervisor  
December 30, 2013  
Page 6

sediment from the tributary watersheds washes into reservoirs on a continuous basis. This accumulation of debris reduces the flood peak attenuation, stormwater capture for recharge, and debris control capacities of the facilities. After fires in 2008 and 2009, storm flows increased the sediment and debris inflow into these facilities. Several reservoirs have lost significant storage capacity and must be cleaned out. Anticipated construction projects under this program include Devil's Gate, Cogswell, Pacoima, Morris, and Big Tujunga Dams and Reservoirs. The cost to remove sediment from these facilities is expected to exceed \$250 million. Due to the large quantity of sediment, new locations and/or partnerships are being pursued in search of additional disposal options. The DWP provided \$10 million each for the Big Tujunga and Pacoima Reservoir Sediment Removal Projects.

Post-Fire Debris Protection – In the aftermath of major fires that occur in the vicinities of neighborhoods, the District investigates the need and feasibility of installing temporary post-fire debris barriers to minimize mudflow impacts to these neighborhoods during storms. When installed, the temporary barriers remain in place and the debris collected by these barriers is removed as needed until the burned hillsides recover, usually about five years. The District installed four debris barriers in the 2007 Ranch Fire area (Castaic and Val Verde), three barriers in the 2008 Santa Anita Fire area (Sierra Madre), three barriers in the 2008 Merek and Sesnon Fire areas (Kagel/Lopez Canyons and Twin Lakes), and networks of barriers along several streets in the 2009 Station fire area (La Crescenta and La Canada Flintridge). About 75 percent of the District's material and installation costs were reimbursed by the Natural Resources Conservation Service under its Emergency Watershed Protection Program. The temporary barriers in the Ranch Fire area have been removed, as have the barriers in the Merek and Sesnon Fire areas. Removal of barriers in the Station Fire area is anticipated to take place in 2014. The District is installing a temporary debris barrier in the 2013 Madison Fire area (Monrovia). The barrier is anticipated to be removed in 2018. There will be no funding from the Natural Resources Conservation Service for this barrier due to the Fall 2013 Federal Government shutdown.

Post-Fire Sediment Management – The 2009 Station Fire, covering 160,000 acres, was the largest fire in Los Angeles County history, compounding the impacts of the 2009 Morris Fire and the 2008 Santa Anita, Merek, Sesnon and Sayre Fires. These fires impacted six of the District's reservoirs and more than 40 of the District's debris basins. Increased frequency and volume of cleanouts of the fire area debris basins have resulted in rapidly filling the District's nearby sediment placement sites and increased use of local landfills. The District expects the need for cleanouts of these fire area facilities and accelerated filling of sediment placement sites to continue through 2014, as the normal recovery period on disasters like this is generally five years. Additionally, some of the reservoirs impacted by the fires do not have their own sediment placement

Each Supervisor  
December 30, 2013  
Page 7

sites, and although utilization of landfills is being coordinated for cleanouts of the District's fire area facilities, the landfills have their own limitations on accommodating the District's volume of debris. The District is exploring opportunities to acquire gravel pits in the City of Irwindale to use for sediment placement as well as groundwater recharge. In an effort to address how sediment will be handled over the next two decades, the department also developed a Sediment Management Strategic Plan with the assistance of stakeholders throughout the region.

#### STORM AND RECYCLED WATER RECHARGE

Additional Spreading Ground Capacity – The District owns and operates 27 groundwater recharge facilities. These facilities allow stormwater runoff, imported water, and recycled water to be percolated into the aquifers. In the interest of improving storage and operational capacity, the District is considering acquiring land for new and expanded spreading grounds. The District is in the process of evaluating water conservation potential at various locations and collaborating with cities and water agencies to cost-share on capital improvements. The District recently completed improvements to the Hansen Spreading Grounds Intake at a cost of \$800,000. Additional anticipated construction projects under this program include improvements to Pacoima, Peck Pit, Dominguez Gap, Live Oak, Eaton Wash, San Gabriel Canyon, and Big Dalton Spreading Grounds, along with the Walnut Spreading Basin. Cost sharing agreements are complete for Live Oak, Lopez, and Pacoima Spreading Grounds. Pacoima, Peck Pit, Dominguez Gap Spreading Grounds and the Walnut Spreading Basin have been chosen to receive Proposition 84 grant money for construction.

Seawater Intrusion Barriers – This program consists of three separate projects designed to prevent saltwater from contaminating underground freshwater supplies. The District has constructed more than 290 recharge wells to inject highly treated water into underground aquifers to form a wall of freshwater under enough pressure to keep out the seawater. The District also utilizes more than 750 observation wells to monitor groundwater levels and chloride concentrations in coastal areas. The District completed the condition assessment of existing pipelines, injection wells, and observation wells associated with the Dominguez Gap Barrier Project in November 2013 at a cost of \$1.1 million. This project was co-funded by the Water Replenishment District and the DWP, with both agencies contributing \$333,000 each. The District also constructed additional observation wells along the Alamitos Barrier in 2013, at a cost of \$1.5 million and with co-funding coming from the other agencies. Future barrier projects include the construction of the Dominguez Gap Barrier Project Telemetry System Phase 1 at a cost of \$1.8 million.

Each Supervisor  
December 30, 2013  
Page 8

Long-Range Water Supply Planning and Climate Change – The District is partnering with the U. S. Department of the Interior – Bureau of Reclamation (Reclamation) to conduct the Los Angeles Basin Stormwater Conservation Study (LA Basin Study). The LA Basin Study is a long-range (80+ years) planning effort that has the objectives of evaluating the long-term potential of existing District facilities, other interrelated facilities, possible new facilities, and operational changes to increase the capture of stormwater for water supply. The LA Basin Study will carry out detailed scientific, engineering, and economic analyses to address future water supply and demand challenges as a result of climate change. The LA Basin Study is estimated to cost \$2.4 million funded under a cost-share arrangement in which Reclamation will provide in-kind services with a value of up to a maximum \$1 million with the remainder covered by the District and other local cost-share partners. The study began in January 2013 and will take two and one half years to complete.

#### WATERSHED HEALTH

Clean Water Act Compliance – As a discharger under the Federal Clean Water Act, the District is required to obtain coverage under a municipal stormwater NPDES permit to operate its flood control system and discharge runoff into the waters of the United States. The permit requires the District to implement programs and controls, including public education, illicit connection/illicit discharge controls, good housekeeping practices, and other control measures, to minimize urban and stormwater runoff pollution from its discharges. The District also conducts water quality monitoring within its drainage system to characterize its discharges, identify pollutant sources, and assess compliance with the permit.

#### INTERNAL AND BUDGETARY CONTROLS

The District has a system of internal accounting controls designed to provide reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use and to provide reliable records for preparing financial statements and maintaining accountability for assets. The concept of reasonable assurance recognizes that the cost of a system of internal accounting controls should not outweigh related benefits and that the evaluation of costs and benefits requires estimates and judgments by management. All internal accounting control evaluations occur within the above framework. We believe that the District's system of internal accounting controls adequately safeguards assets and provides reasonable assurance of the proper recording of financial transactions.

In accordance with the provisions of Sections 29000-29144 of the Government Code of the State of California, commonly known as the County Budget Act, District budgets are

Each Supervisor  
December 30, 2013  
Page 9

adopted on or before October 2 of each fiscal year. Expenditures are controlled at the object level for all budget units within the District, except for capital asset expenditures, which are controlled at the object class level. Budgets are generally adopted for the District's General Fund and Debt Service Fund.

Encumbrance accounting is utilized to ensure effective budgetary control and accountability. Unencumbered appropriations lapse at year-end.

Your Board approves all transfers of appropriations between budget units and transfers exceeding \$250,000 within budget units. Your Board must also approve necessary supplemental appropriations normally financed by unanticipated revenues earned during the year.

In addition to these procedural controls, the District is subject to periodic internal control, operational and management audits performed by the County Auditor-Controller to help ensure that prescribed procedures are followed and that operations are conducted in an efficient manner. The Auditor-Controller also operates a fraud hotline that provides employees and citizens a way to anonymously report perceived fraudulent activities by employees, vendors, contractors, and inspectors. Allegations reported through the hotline are evaluated and investigated by the Auditor-Controller as appropriate.

## **OTHER INFORMATION**

### **INDEPENDENT AUDIT**

The Continuing Disclosure Agreement dated January 1, 2003, by and between the Los Angeles County Flood Control District and The Bank of New York Trust Company, N. A., as Trustee, requires an annual audit of the basic financial statements of the District. Moss, Levy & Hartzheim, LLP, audited the District's basic financial statements for the fiscal year ended June 30, 2013. The auditor's report on the basic financial statements is included in the Financial Section of this report.

### **AWARD**

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the District for its comprehensive annual financial report for the fiscal year ended June 30, 2012. This was the sixth consecutive year the District achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual

Each Supervisor  
December 30, 2013  
Page 10

financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the requirements of the Certificate of Achievement Program, and we will submit it to the GFOA for certification.

### **ACKNOWLEDGEMENTS**

This report could not have been prepared without the cooperative efforts of the staff of Public Works' Financial Management Branch; various Public Works line divisions, including the Watershed Management, Water Resources, Flood Maintenance, Construction, and Design Divisions, as well as the Public Relations Group; and the Auditor-Controller. The District would also like to thank our independent auditors, Moss, Levy & Hartzheim, LLP, for their professional assistance.

**INDEPENDENT AUDITOR'S REPORT**

Honorable Board of Supervisors  
County of Los Angeles, California

**Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities, each major fund, and the fiduciary funds of the Los Angeles County Flood Control District (District), a blended component unit of the County of Los Angeles, as of and for the fiscal year ended June 30, 2013, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

**Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

**Auditor's Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

**OFFICES: BEVERLY HILLS · CULVER CITY · SANTA MARIA**

MEMBER AMERICAN INSTITUTE OF C.P.A.'S · CALIFORNIA SOCIETY OF MUNICIPAL FINANCE OFFICERS · CALIFORNIA ASSOCIATION OF SCHOOL BUSINESS OFFICIALS

## Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the fiduciary funds of the District, as of June 30, 2013, and the respective changes in financial position for the fiscal year then ended in accordance with accounting principles generally accepted in the United States of America.

## Emphasis of Matter

As discussed in Note 2 to the basic financial statements effective July 1, 2012, the District adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 60, *Accounting and Financial Reporting for Service Concession Agreements*, Statement No. 61, *The Financial Reporting Entity: Omnibus*, Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*, and Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*. Our opinion is not modified with respect to this matter.

## Other Matters

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the Budgetary Comparison Schedules of the General Fund on pages 4 through 15 and page 43 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The Introductory Section, the Statement of Changes in Assets and Liabilities – Fiduciary Funds, and the Statistical Section are presented for purposes of additional analysis and are not required parts of the basic financial statements.

The Statement of Changes in Assets and Liabilities – Fiduciary Funds is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated December 28, 2013, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

**LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS**

Our discussion and analysis of the Los Angeles County Flood Control District's (District) financial performance provides a narrative overview and analysis of the District's financial activities for the fiscal year ended June 30, 2013. We encourage readers to consider the information presented here in conjunction with information contained in the letter of transmittal and accompanying basic financial statements, notes, and supplementary information.

The District is a component of a larger governmental unit, the County of Los Angeles (County). We also encourage readers to use the Comprehensive Annual Financial Report of the County of Los Angeles to provide perspective on the government-wide and fund based statements and on how the District is a component of those statements.

**FINANCIAL HIGHLIGHTS**

At the end of the reporting year, the net position (total assets less total liabilities) of the District was \$6.0 billion.

During the year, the District's net position increased by \$20.7 million. The increase was a result of the District's governmental activities. The District has no business-type activities to report.

At the end of this fiscal year, the District's General Fund reported a total fund balance of \$240.9 million. The fund balance categories and amounts consisted of restricted fund balance of \$240.8 million and assigned fund balance of \$0.1 million.

The District's capital asset balance net of accumulated depreciation was \$5.790 billion at year-end, and decreased by \$43 million during the year.

**OVERVIEW OF THE FINANCIAL STATEMENTS**

This discussion and analysis serves as an introduction to the District's basic financial statements, which are comprised of the following three components:

- Government-wide financial statements
- Fund financial statements
- Notes to the basic financial statements

This report also includes required and other supplementary information in addition to the basic financial statements.

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

**GOVERNMENT-WIDE FINANCIAL STATEMENTS**

The government-wide financial statements provide readers with a broad overview of the District's finances in a manner similar to a private sector business.

The Statement of Net Position presents information on all of the District's assets and liabilities, with the difference representing net position. Over time, increases or decreases in the District's net position may serve as an indicator of improvement or decline of its financial health.

The Statement of Activities shows the change in the District's net position during the fiscal year. All changes in net position are reported when the underlying events giving rise to the change take place, regardless of the timing of related cash flows. Therefore, revenues and expenses are reported in this statement for some items that will affect future cash flow. For example, property tax revenues have been recorded that have been earned but not yet collected and workers' compensation expenses that have been accrued but not yet paid.

The government-wide financial statements of the District report only one category, governmental activities, as the District has no business-type activities or discretely presented component units for which the District is financially accountable.

*Governmental Activities* – All of the District's basic services are included here. Property taxes and benefit assessments finance most of the District's flood control activities.

**FUND FINANCIAL STATEMENTS**

The fund financial statements provide detailed information about the District's significant funds. Funds are accounting devices used to keep track of specific funding sources and spending for particular purposes. The District has two kinds of funds:

*Governmental Funds* – All of the District's basic services are included in governmental funds, which focus on resource inflow and outflow and show available balances at year-end. The governmental fund statements provide a detailed short-term view that helps readers determine whether there is an increase or decrease in financial resources available for spending in the near future on the District's activities. Because this information does not encompass the additional long-term focus of the government-wide statements, we show the relationship between governmental activities and governmental funds using reconciliations on pages 19 and 22 and the notes to the basic financial statements.

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

*Fiduciary Funds* – Assets held in an agency capacity for others and unable to be used to support District activities are known as fiduciary funds. The District's agency funds are reported in this fund category using the accrual basis of accounting.

**NOTES TO THE BASIC FINANCIAL STATEMENTS**

The notes to the basic financial statements provide additional information, essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes begin on page 24 of this report.

**REQUIRED SUPPLEMENTARY INFORMATION (RSI)**

In addition to the basic financial statements and accompanying notes, this report presents required supplementary information concerning the District's budget as well as actual revenues and expenditures on a budgetary basis. The RSI is located on pages 43 through 45 of this report.

**GOVERNMENT-WIDE FINANCIAL ANALYSIS**

A comparative analysis of government-wide data is available and presented under the reporting model required by Governmental Accounting Standards Board (GASB) Statement No. 34. The District does not have business-type activities to report.

As noted earlier, net position can serve over time as a useful indicator of a government's financial position. In the case of the District, assets exceeded liabilities by \$6.0 billion at the close of the most recent fiscal year (see Table 1).

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

**Table 1**

Summary of Net Position  
As of June 30, 2013 and 2012  
(in thousands)

	Governmental Activities	
	<u>2013</u>	<u>2012</u>
Current and other assets	\$ 282,804	\$ 212,943
Capital assets	<u>5,789,611</u>	<u>5,832,592</u>
Total assets	<u>\$6,072,415</u>	<u>\$6,045,535</u>
Current and other liabilities	\$ 32,769	\$ 10,310
Long-term liabilities	<u>39,885</u>	<u>56,136</u>
Total liabilities	<u>72,654</u>	<u>66,446</u>
Net position:		
Net investment in capital assets	5,769,841	5,795,397
Restricted net position	229,821	183,593
Unrestricted net position	<u>99</u>	<u>99</u>
Total net position	<u>5,999,761</u>	<u>5,979,089</u>
Total liabilities and net position	<u>\$6,072,415</u>	<u>\$6,045,535</u>

As indicated above, the District's total net position consist of the following three components:

**Net Investment in Capital Assets**

The District's net investment in capital assets total \$5.770 billion. This represents its investment in capital assets (e.g., land and easements, and buildings, improvements, infrastructure, and equipment—net of accumulated depreciation), less any outstanding debt related to acquiring those assets. At June 30, 2013, the District reported bonds payable of \$19.8 million related to capital assets. It should be noted that the resources needed to repay this debt must derive from other sources; the capital assets themselves usually are not utilized to liquidate these liabilities. The District uses these capital assets to provide services to citizens. Consequently, these assets are not available for future spending.

**Restricted Net Position**

The District's restricted net position at year-end was \$229.8 million, primarily for Capital Projects and Public Protection. These restrictions are imposed by bond covenants for construction, debt service, and reserves.

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

Unrestricted Net Position

The District's unrestricted net position of \$0.1 million is available to meet the District's ongoing financial requirements.

Governmental Activities

Table 2 indicates the changes in net position for the governmental activities.

Changes in net position	20,672	43,280
Net position – beginning	<u>5,979,089</u>	<u>5,935,809</u>
Net position – ending	<u>\$5,999,761</u>	<u>\$5,979,089</u>

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

The District's change in net position was \$22.6 million less than the prior year. Following are the major factors that contributed to the net position changes:

- Revenues from governmental activities increased by \$9.0 million (4%) from the prior year. The most significant change in revenue was in property taxes due to an increase of assessed property values. The assessed property tax roll grew for the second consecutive year and was 2.2% higher in the current year. Property tax revenues also increased due to State legislation which dissolved redevelopment agencies and shifted property taxes to local government agencies, including the Flood Control District.
- Governmental activity expenses were \$31.7 million (16%) higher than the previous year due primarily to increases in public protection. The District reevaluated liabilities for litigation which accounted for the growth in public protection costs.

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

**FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS**

As noted earlier, the District uses fund accounting to ensure compliance with finance related legal requirements, tracking funding sources and spending for defined purposes.

Types of governmental funds utilized by the District include General (commonly referred to as the Flood Fund) and Debt Service Funds. The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of resources available for spending. The information is useful in assessing the District's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of June 30, 2013, the District's governmental funds reported a combined fund balance of \$240.9 million, an increase of \$47.8 million in comparison with the prior fiscal year. Of the total fund balance, \$240.8 million is classified as restricted and \$0.1 million as assigned.

Revenues in the District's governmental funds, primarily the General Fund, were \$255.8 million, an increase of \$9.3 million (4%) from the previous year. Property taxes, which were \$112.5 million, were a major source of revenue for the governmental funds. Property taxes increased \$10.7 million (11%) from the previous year. As previously mentioned, the increase is due to higher assessed property values and new property tax revenue from the dissolution of redevelopment agencies. Another significant source of revenue was charges for services, which were \$117.4 million. Charges for services increased \$0.6 million (1%) from the previous year. Together, these two revenue sources accounted for 90% of total revenues for all the governmental funds.

Expenditures for the governmental funds totaled \$208.2 million, an increase of \$4.1 million (2%) from the previous year. This was significantly caused by an increase of infrastructure improvements. For the reporting year, revenues for governmental activities exceeded expenditures by \$47.6 million.

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

GENERAL FUND BUDGETARY HIGHLIGHTS

Budgetary Summary – Revenues/Financing Sources

Table 3 is a summary of reporting year budgetary changes and actual results for the District's General Fund revenues and other financing sources (in thousands).

Table 3

<u>Category</u>	<u>Increase (Decrease) From Original Budget</u>	<u>Final Budget Amount</u>	<u>Actual Amount</u>	<u>Variance - Positive (Negative)</u>
Taxes	\$ 12,553	\$ 109,380	\$ 108,635	\$ (745)
Intergovernmental revenues	(4,231)	1,565	9,548	7,983
Charges for services		112,668	117,128	4,460
All other revenues		14,474	19,081	4,607
Other sources and transfers		70	128	58
Changes in reserves/designations		(34,156)	(20,875)	13,281
Total	\$ 8,322	\$ 204,001	\$ 233,645	\$ 29,644

Changes from Amounts Originally Budgeted

During the year, the net change in the District's General Fund budget was a positive \$8 million. The change resulted from a \$12 million property tax revenue increase offset by a decrease of budgeted Community Redevelopment Agency revenues of \$4 million. The District's policy is to increase the budget for certain tax revenues that exceed the amounts originally budgeted. The revised budget action occurs at the end of the fiscal year and is designed to demonstrate compliance with legal provisions related to the appropriation of revenues from taxes.

Actual Revenues/Financing Sources Compared With Final Budget Amounts

Actual revenues and other financing sources recognized by the District's General Fund were \$29.6 million (15%) more than budgeted. The variance resulted primarily from the following:

- Increase in grant fundings from Federal and State for various projects.
- Increase in Catch Basin Insert cleanout revenues from cities.
- Increase in interest, royalties, and County Council refund for Strathern Pit case settlement.
- Increase in reserves and designations as a result of the cancelation of existing contracts and purchase orders.

**LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued**

**Budgetary Summary - Expenditures/Other Financing Uses**

Table 4 is a summary of current year budgetary changes and actual results for the District's General Fund expenditures and contingencies (in thousands).

**Table 4**

<u><b>Category</b></u>	<b>Increase (Decrease) From Original Budget</b>	<b>Final Budget Amount</b>	<b>Actual Amount</b>	<b>Variance - Positive (Negative)</b>
Public protection and transfers out	\$ -	\$249,328	\$210,720	\$ 38,608
Contingencies	8,322	8,322		8,322
Total	\$ 8,322	\$257,650	\$210,720	\$ 46,930

**Changes from Amounts Originally Budgeted**

During the year, the net change in the District's General Fund budgeted contingencies was a positive \$8 million. The increase resulted from a Gann budget adjustment for property tax collection that exceeded the budgeted amount.

**Actual Expenditures/Other Financing Uses Compared with Final Budget Amounts**

Actual expenditures and other financing uses in the District's General Fund were \$47 million lower than budgeted. The variance primarily resulted from changes in the District's project schedule that generally occur as a result of various circumstances delaying the award of construction projects. Delays are expected and an inventory of projects is kept ready for replacing projects that remain in planning stages or are otherwise delayed.

LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

**CAPITAL ASSETS AND DEBT ADMINISTRATION**

**Capital Assets**

At June 30, 2013, the District had \$5.79 billion (net of depreciation) invested in capital assets including land and easements, buildings and improvements, infrastructure, and equipment (see Table 5).

The District's capital assets (net of depreciation) for the reporting fiscal year decreased \$43 million (0.7%) from the prior fiscal year:

Table 5

Changes in Capital Assets, Net of Depreciation (in thousands)

	Reporting Year	Prior Year	Increase (Decrease)
Land and easements	\$3,663,736	\$3,658,844	\$ 4,892
Buildings and improvements (B&I)	63,133	64,841	(1,708)
Infrastructure	1,990,817	2,050,119	(59,302)
Equipment	534	532	2
Construction-in-progress - infrastructure	71,391	58,256	13,135
Total	\$5,789,611	\$5,832,592	\$ (42,981)

Infrastructure costs were capitalized for projects that remained in progress at the end of the year. The value of construction-in-progress at June 30, 2013, was \$71.4 million and the value will be classified in the Construction-in-Progress category until the projects are completed. For additional information on Capital Asset activity see Note 5 on page 37.

The \$9.8 million in infrastructure asset additions (see Note 5) includes projects completed this year under the Construction-in-Progress category. The completed projects totaled \$7.3 million and are listed below and on the following page (asset values are prior to depreciation).

Channels

- Gridley Drain-Private Drain 190, Project No. 29, La Mirada Creek (\$321,400)

Dams

- Access Bridge over Brown's Gulch at San Gabriel Dam (\$3,837,200)

Detention/Retention Basin

- Tujunga Wash-Hansen Spreading Grounds Intake Improvements, Obermeyer Gate System (\$1,499,400)

FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued

Capital Assets-Continued

Pumping Plant

- Garnet Pump Station Rehabilitation (\$954,300)

Storm Drain

- Rubio Wash Storm Drain No. 1 (\$675,500)

Debt Administration

At June 30, 2013, the District had \$39.9 million in long-term debt. The District's long-term debt consisted of \$19.8 million in bonds and \$20.1 million in other liabilities. The District's long-term debt decreased by approximately \$16.3 million (29%) this year as a result of scheduled debt service payments. Specific disclosures related to long-term obligations appear in Notes 6 and 8.

Table 6 indicates changes in the District's long-term debt during the year:

Table 6  
Changes in Long-Term Debt (in thousands)

	Current Year	Prior Year	(Increase) Decrease
Capital Construction and Refunding Bonds	\$ 5,745	\$22,275	\$16,530
Revenue Bonds	14,025	14,920	895
Other Liabilities	20,115	18,941	(1,174)
Total	\$39,885	\$56,136	\$16,251

Bond Ratings

The District's debt is rated by Moody's, Standard and Poor's, and Fitch. The following is a schedule of ratings:

	<u>Moody's</u>	<u>Standard and Poor's</u>	<u>Fitch</u>
Revenue Bonds	Aaa	AA	AAA

Since the prior reporting, Moody's upgraded the rating for the Flood Control District Revenue Bonds from Aa1 to Aaa.

**LOS ANGELES COUNTY  
FLOOD CONTROL DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS-Continued**

**ECONOMIC CONDITIONS AND OUTLOOK**

The Board of Supervisors adopted the District's 2013-2014 Budget on June 24, 2013. The Budget was adopted based on the estimated fund balance that would be available at the end of 2012-2013. The Board updated the Budget on October 8, 2013, to reflect the final 2012-2013 fund balances and other pertinent financial information. For the District's General Fund, the 2013-2014 Budget utilized \$77 million of available fund balance, which exceeded the previously estimated fund balance of \$10 million. The additional fund balance of \$67 million was appropriated or designated for flood control infrastructure improvement needs.

The District's 2013-14 Budget anticipates the continuation of moderate growth that began to emerge in 2012-13. Revenues associated with sales taxes are trending higher and assessed property values are 2.2% higher in the current year, which will provide additional property tax revenues to the District. The District also faces salary increases that have been negotiated or for which negotiations are in progress.

**CONTACTING THE DISTRICT'S FINANCIAL MANAGEMENT**

This financial report was designed to provide citizens, taxpayers, customers, investors, creditors, and other stakeholders with a general overview of the District's finances and to show the District's accountability for the money it receives. If you have questions about this report or need additional financial information, please contact the District's Financial Management Branch at the Department of Public Works, 900 South Fremont Avenue, 7th Floor, Alhambra, California 91803-1331.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES  
IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES  
FOR THE FISCAL YEAR ENDED JUNE 30, 2013 (in thousands)

Net change in fund balances - total governmental funds (page 21)	\$	47,754
--	----	--------

Amounts reported for governmental activities in the Statement of  
Activities are different because:

Governmental funds report capital outlays as expenditures.  
However, in the Statement of Activities, the cost of those  
assets is allocated over their estimated useful lives and  
reported as depreciation expense:

Expenditures for general capital assets, infrastructure and other related capital asset adjustments	\$	31,146	
Less - current year depreciation expense		<u>(70,842)</u>	(39,696)

In the Statement of Activities, only the gain/(loss) on the sale/disposal of capital assets is reported, whereas in the governmental funds, the proceeds from the sale of capital assets increases financial resources, thus, the change in net position differs from the change in fund balance	(3,285)
--	---------

Revenue timing differences result in more/(less) revenue in Government-wide Statements	(639)
---	-------

Repayment of bond principal is an expenditure in the governmental funds but the repayment reduces long-term liabilities in the Statement of Net Position	17,425
--	--------

Accrued interest for bonds payable; this is the net change in accrued interest for the current period	287
--	-----

Some expenses reported in the accompanying Statement of  
Activities do not require (or provide) the use of current  
financial resources and therefore are not reported as  
expenditures in governmental funds:

Change in litigation/self insurance	<u>(1,174)</u>
-------------------------------------	----------------

Change in net position of governmental activities (page 17)	\$	<u>20,672</u>
---	----	---------------

The notes to the basic financial statements are an integral part of this statement.

# Notes to the Basic Financial Statements

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General

The Los Angeles County Flood Control District's (District) mission is to carry out the objectives of the Los Angeles County Flood Control Act. Its objectives include providing for the control and conservation of flood, storm, and other wastewater, as well as protecting the harbors, waterways, public highways, and properties within the District from damage from flood or storm waters. The District's powers are exercised through the County of Los Angeles Board of Supervisors (Board), which acts as the District's governing body. The duties of the Board include approving the District's budget, determining the District's tax rates, approving contracts, and determining whether to issue bonds authorized by the voters of the District.

Reporting Entity

District management has determined that the Public Works Financing Authority (PWFA) should be included in the basic financial statements of the District as a blended component unit. The PWFA is dependent upon the District for funding. The PWFA is a public agency organized pursuant to a Joint Exercise of Powers Agreement between the District and the County dated May 18, 1993. The PWFA is empowered to finance District capital assets through the issuance of bonds.

A blended component unit is an entity that, because of a close relationship with a primary government, should be blended in the basic financial statements as though it were part of the primary government. The District does not have any other component units that should be discretely presented. For additional information on PWFA, please contact the District's Financial Management Branch at the Department of Public Works, 900 South Fremont Avenue, 7th Floor, Alhambra, California 91803.

The District is included as a blended component unit of the County of Los Angeles financial reporting entity and is included in the County's Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2013. The financial resources and operations of the District are accounted for in the fund types discussed below.

Basic Financial Statements

The basic financial statements of the District are composed of the following:

- Government-wide financial statements
- Fund financial statements
- Notes to the basic financial statements

Financial reporting incorporates all GASB pronouncements.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

Government-wide Financial Statements

Government-wide financial statements display information about the District as a whole. The Statement of Net Position and Statement of Activities display information about the District with the exclusion of fiduciary activities.

Basis of Accounting

Government-wide financial statements are presented using the economic resource measurement focus and the accrual basis of accounting. Under the economic resource measurement focus, all (both current and long-term) economic resources and obligations of the reporting government are reported. Basis of accounting refers to when revenues and expenses are recognized in the accounts and reported in the basic financial statements. Under the accrual basis of accounting, revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place. Revenues, expenses, gains, losses, assets, and liabilities resulting from nonexchange transactions are recognized in accordance with the requirements of GASB Statement No. 33.

Proceeds of long-term debt are recorded as a liability rather than as another financing source. Amounts paid to reduce long-term indebtedness of the reporting government are reported as a reduction of related liabilities rather than as expenditures.

Net position is classified into the following three categories: (1) net investment in capital assets, (2) restricted, and (3) unrestricted. Net position is reported as restricted when its use has been constrained by externally imposed conditions. Such conditions include limitations imposed by creditors (such as through debt covenants), grantors, or laws and regulations of other governments, and restrictions imposed by law through constitutional provisions or enabling legislation. At June 30, 2013, there were no restricted assets impacted by enabling legislation.

When both restricted and unrestricted net position are available, restricted resources are used first and then unrestricted resources are used to the extent necessary.

At June 30, 2013, the District had recorded restricted net position in the Governmental Activities as follows (in thousands):

	Governmental Activities
Restricted for:	
Capital Projects	\$ 125,426
Public Protection	104,395
Total Restricted	<u>\$ 229,821</u>

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

Fund Financial Statements

The accounting system of the District is organized and operated on the basis of separate funds, each of which is considered to be a separate accounting entity. The operation of each fund is accounted for with a separate set of self balancing accounts comprised of its assets, liabilities, fund balances, revenues, and expenditures.

Fund Balance

In the fund financial statements, the governmental funds report the classification of fund balance in accordance with GASB 54 "Fund Balance Reporting and Governmental Fund Type Definitions." The reported fund balances are categorized as nonspendable, restricted, committed, assigned, or unassigned based on the extent to which the District is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. The classifications are as follows:

Nonspendable – The nonspendable fund balance category includes amounts that cannot be spent because they are not in spendable form, or legally or contractually required to be maintained intact. The "not in spendable form" criterion includes items that are not expected to be converted to cash. It also includes the long-term amount of interfund loans.

Restricted – Fund balance is reported as restricted when constraints placed on the use of resources are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or is imposed by law through constitutional provisions or enabling legislation (District ordinances).

Enabling legislation authorizes the District to assess, levy, charge, or otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. Legal enforceability means that the District can be compelled by an external party-such as citizens, public interest groups, or the judiciary to use resources created by enabling legislation only for the purposes specified by the legislation.

Committed – The committed fund balance classification includes amounts that can be used only for the specific purposes imposed by formal action (ordinance or resolution) of the County's highest level of decision-making authority, the County's Board. Those committed amounts cannot be used for any other purpose unless the Board removes or changes the specified use by taking the same type of action (ordinance or resolution) it employed to previously commit

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

those amounts. The underlying action that imposed the limitation needs to occur no later than the close of the fiscal year. In contrast to fund balance that is restricted by enabling legislation, committed fund balance classification may be redeployed for other purposes with appropriate due process. Constraints imposed on the use of committed amounts are imposed by the Board, separate from the authorization to raise the underlying revenue; therefore, compliance with these constraints are not considered to be legally enforceable. Committed fund balance also incorporates contractual obligations to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual requirements.

As mentioned, the Board establishes, modifies, or rescinds fund balance commitments by passage of an ordinance or resolution. In FY 2012-13, the District reviewed the GASB 54 criteria and determined that an ordinance and a resolution are equally binding, and either action can establish a fund balance commitment. This is done through the adoption of the budget and subsequent amendments that occur throughout the fiscal year. Once the budget is adopted, the limitations imposed by the budget remain in place until a similar action is taken.

Assigned – Amounts in the assigned fund balance classification are intended to be used by the District for specific purposes but do not meet the criteria to be classified as restricted or committed. In governmental funds other than the General Fund, assigned fund balance represents the remaining amount that is not restricted or committed. In the General Fund, assigned amounts represent intended uses established by the Board. The intent can be established at either the highest level of decision making, or by a body or an official designated for that purpose. Authorization to assign fund balance rests with the County's Board through the budget process. The Board has also delegated authority to the Chief Executive Officer and the Head of the Department of Public Works for contracts and purchasing authority.

Unassigned – Unassigned fund balance is the residual classification for the General Fund and includes all spendable amounts not contained in the other classifications. In other governmental funds, the unassigned classification is used only to report a deficit balance resulting from overspending for specific purposes for which amounts had been restricted, committed, or assigned.

The District applies restricted resources first when expenditures are incurred for purposes for which either restricted or unrestricted (committed, assigned, and unassigned) amounts are available.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

Similarly, within unrestricted fund balance, committed amounts are reduced first, followed by assigned, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of the unrestricted fund balance classifications could be used.

The constraints placed on fund balance for the major governmental funds and all other governmental funds at June 30, 2013 are as follows (in thousands):

	<u>General</u> <u>Fund</u>	<u>Debt</u> <u>Service</u>	<u>Total</u>
Fund Balances			
Restricted for:			
Capital Projects	\$ 125,426	\$ -	\$ 125,426
Public Protection	<u>115,359</u>	<u>          </u>	<u>115,359</u>
Total Restricted	240,785		240,785
Assigned	<u>99</u>	<u>          </u>	<u>99</u>
Total Fund Balances	<u>\$ 240,884</u>	<u>\$ -</u>	<u>\$ 240,884</u>

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

Fund financial statements are presented after the government-wide financial statements. These statements display information about major funds individually and in the aggregate for governmental funds.

The fund financial statements provide information about the District's funds, including fiduciary funds. Separate statements for governmental and fiduciary fund categories are presented.

The District reports on the following major governmental funds:

- General Fund

The General Fund is available for any authorized purpose and is used to account for all financial resources except those required to be accounted for in another fund.

- Debt Service Fund

The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, long-term debt, including principal and interest.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

- Capital Project Fund

The Capital Project Fund is used to account for financial resources to be used for the acquisition and/or construction of flood control structures financed by long-term debt.

The District also reports on the following funds:

- Fiduciary Funds (Agency Funds)

The Agency Funds are used to account for assets held by the District in an agency capacity pending transfer or distribution to individuals, private organizations, other governmental entities, or other funds. Such funds have no equity accounts since all assets are primarily made up of deposits due to individuals or entities at some future time. The Agency Funds consist of funds for the acquisition of rights-of-way for flood control projects and deposits received, from other governmental entities, private companies, and individuals, as part of an agreement, permit, contractual obligation, or other pre-payment requirement stemming from flood control construction projects or maintenance work.

Basis of Accounting

In the fund financial statements, governmental funds are presented using a modified accrual basis of accounting. Revenues are recognized when they become measurable and available to finance operations during the year. Secured and unsecured property taxes and benefit assessments estimated to be collectible in future years are recorded as receivables and unearned revenue. The accrual of property tax revenues is generally limited to the extent that collection takes place within 60 days following the balance sheet date.

Interest income and charges for current services are accrued when earned and determined available. Changes in the fair value of investments are recognized as revenues at the end of each year. Federal and State grants are recorded as revenue when determined to be available, entitlement occurs, and relevant expenditures are incurred. Revenues not accrued include licenses, permits, and miscellaneous revenues. Expenses are generally recognized under the modified accrual basis of accounting when the related liability is incurred, with the exception of interest on long-term debt, which is recognized when payment is due.

In the fund financial statements, governmental funds are presented using the current financial resource measurement focus. This means that only current assets and current liabilities are generally included on their balance sheets. Noncurrent portions

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

of long-term receivables due from governmental funds are reported on the District's balance sheet and are offset by unearned revenue. The reported fund balance (net current assets) is considered to be a measure of "available spendable resources." Governmental fund operating statements present increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Accordingly, they are said to present a summary of sources and uses of "available spendable resources" during a period.

As a result of its spending measurement focus, expenditure recognition for governmental fund types excludes transactions involving noncurrent liabilities. Since they do not affect net current assets, such long-term amounts are not recognized as governmental fund type expenditures or fund liabilities.

Amounts expended to acquire capital assets are recorded as expenditures in the year that resources were expended rather than as fund assets. The proceeds of long-term debt are recorded as another financing source rather than as a fund liability. Amounts paid to reduce long-term indebtedness are reported as fund expenditures.

Property Taxes

All jurisdictions within California derive their taxing authority from the State Constitution and various legislative provisions contained in the State Government Code and Revenue and Taxation Code. Property is assessed at full cash or market value (with some exceptions). Pursuant to such legislation, the Board levies a property tax to support general operations of the various jurisdictions (ad valorem tax). This tax is limited to one percent (1%) of full cash value of property and collections are distributed in accordance with statutory formulae. The District receives an apportionment from the property tax levy, which is a major source of District revenue.

Property taxes are levied on both real and personal property. Secured property taxes are levied in September of each year. They become a lien on real property on January 1 preceding the fiscal year for which taxes are levied. Tax payments can be made in two equal installments: the first is due November 1 and is delinquent with penalties after December 10; the second is due February 1 and is delinquent with penalties after April 10. Secured property taxes delinquent and unpaid as of June 30, are declared to be tax defaulted and subject to redemption penalties, costs, and interest. Properties with delinquent taxes, unpaid after five years, are subject to being sold at public auction, and having the proceeds used to pay the delinquent amounts. Any excess is remitted to the taxpayer, if claimed.

Unsecured personal property taxes are not a lien against real property. These taxes are due on August 1 and become delinquent on August 31, if unpaid. Unsecured

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

property tax receivables are reduced by an amount estimated to be uncollectible, which is based on a five-year historical average collection percentage.

Legislation Dissolving Redevelopment Agencies and Effect on Property Taxes

State Assembly Bill x1 26 (AB x1 26), also referred to as the "Redevelopment Dissolution Act," was upheld by the State Supreme Court in December 2011 and redevelopment agencies were dissolved on February 1, 2012. As a result, property taxes have shifted from redevelopment agencies to local government agencies, including the District.

Benefit Assessments

The District, as authorized by the State Government Code, levies an assessment on each parcel of real property within the District, except on property owned by Federal, State, or local government agencies. The assessment, as approved by the Board, is levied in proportion to benefits received and determined on the basis of the proportionate stormwater runoff from each parcel. The purpose of benefit assessments is to cover the cost of providing flood control services, not offset by other available revenues.

Deposits and Investments

In accordance with GASB Statement No. 31, "Accounting and Financial Reporting for Certain Investments and for External Investment Pools," the accompanying financial statements reflect the fair value of investments. Changes in fair value that occur during a fiscal year are recognized as investment income reported for the fiscal year. Investment income includes interest earnings, changes in fair value, and any gains or losses realized upon the liquidation, maturity, or sale of investments.

All cash and investment balances of the District are pooled and invested by the County Treasurer and are subject to withdrawal from the pool upon demand. Each fund's share in the pool is displayed in the accompanying financial statements as pooled cash and investments. Investment income earned by the pooled investments is allocated to various funds based on a pro rata share of the fund's average cash and investment balance as provided by Government Code Section 53647.

The fair value of pooled investments is determined annually and based on current market prices. The method used to determine the value of participants' equity withdrawn is based on the book value of the participants' percentage participation at the date of such withdrawals rather than market value.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

Other Investments

"Other Investments" represents investment and interest earnings related to the debt issuance currently held in trust by the Bank of New York Trust Company, N. A.

Capital Assets

Capital assets, which include land and easements, buildings and improvements, equipment, and infrastructure, are reported in the government-wide financial statements. Capital assets are recorded at historical cost if purchased, or estimated historical cost if constructed. Donated capital assets are recorded at estimated fair value at the date of donation.

Capital outlays are recorded as expenditures of the General and Capital Project Funds and as assets in the government-wide financial statements to the extent the District's capitalization threshold is met.

The County's policy is to record infrastructure costs as services and supplies expenditures in the General Fund and capitalize as assets in the government-wide financial statements to the extent the District's capitalization threshold is met.

The District's capitalization thresholds are \$5,000 for equipment, \$100,000 for buildings and improvements, and \$25,000 for infrastructure assets. Maintenance and repairs are charged to operations when incurred. Betterments and major improvements that significantly increase values, change capacities, or extend useful lives are capitalized. Upon sale or retirement of capital assets, the cost and the related accumulated depreciation, as applicable, are removed from the respective accounts and any resulting gain or loss is included in the results of operations. Specific disclosures related to capital assets appear in Note 5.

Capital assets are depreciated using the straight-line method over the following estimated useful lives:

Buildings and Improvements	10 to 50 years
Equipment	2 to 35 years
Infrastructure	15 to 100 years

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES-Continued

Unearned Revenue

Under the accrual basis and the modified accrual basis of accounting, revenues are recognized only when earned. Thus, the government-wide statement of net position and governmental funds defer revenue recognition for resources that have been received at fiscal year-end, but not yet earned. Assets recognized before the earning process is complete are offset by a corresponding liability as unearned revenue. Under the modified accrual basis of accounting, revenues are recognized when earned and susceptible to accrual. Revenues are considered susceptible to accrual if they are measurable and available to finance expenditures of the current period.

Thus, governmental funds also defer revenue recognition for revenues not considered available to liquidate liabilities of the current period.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of some assets and liabilities, disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenditures during the reporting period. Actual results may differ from those estimates.

2. NEW ACCOUNTING PRONOUNCEMENTS

The District has implemented the requirements of Governmental Accounting Standards Board (GASB) Statements No. 60, 61, 62, and 63 during the fiscal year ended June 30, 2013.

Governmental Accounting Standards Board Statement No. 60

For the fiscal year ended June 30, 2013, the District implemented Governmental Accounting Standards Board (GASB) Statement No. 60, "Accounting and Financial Reporting for Service Concession Arrangements." This Statement is effective for periods beginning after December 15, 2011. The objective of this Statement is to improve financial reporting by addressing issues related to Service Concession Arrangements. This Statement improves consistency in reporting and enhances the comparability of the accounting and financial reporting of Service Concession Arrangements among state and local governments. Implementation of GASB Statement No. 60 did not have an impact on the District's financial statements for the fiscal year ended June 30, 2013.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

2. NEW ACCOUNTING PRONOUNCEMENTS-Continued

Governmental Accounting Standards Board Statement No. 61

For the fiscal year ended June 30, 2013, the District implemented Governmental Accounting Standards Board (GASB) Statement No. 61 "The Financial Reporting Entity: Omnibus." This Statement is effective for periods beginning after June 15, 2012. The objective of this Statement is to improve financial reporting for component units. The Statement modifies certain requirements for inclusion of component units in the financial reporting entity and clarifies the reporting of equity interests in legally separate organizations. Implementation of GASB Statement No. 61 did not have an impact on the District's financial statements for the fiscal year ended June 30, 2013.

Governmental Accounting Standards Board Statement No. 62

For the fiscal year ended June 30, 2013, the District implemented Governmental Accounting Standards Board (GASB) Statement No. 62 "Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements." This Statement is effective for periods beginning after December 15, 2011. The objective of this Statement is to incorporate into the GASB's authoritative literature certain accounting and financial reporting guidance that is included in the FASB and AICPA pronouncements issued on or before November 30, 1989. This Statement specifically identifies and consolidates the accounting and financial reporting provisions that apply to state and local governments. Implementation of the Statement and the impact on the District's financial statements are explained in Note 1.

Governmental Accounting Standards Board Statement No. 63

For the fiscal year ended June 30, 2013, the District implemented Governmental Accounting Standards Board (GASB) Statement No. 63, "Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position." This Statement is effective for periods beginning after December 15, 2011. The objective of this Statement is to establish guidance for reporting deferred outflows of resources, deferred inflows of resources, and net position in a statement of financial position. This Statement sets forth framework that specifies where deferred outflows of resources and deferred inflows of resources, as well as assets and liabilities should be displayed. This Statement also specifies how net position, no longer referred to as net assets, should be displayed. Implementation of the Statement resulted in restating net assets to net position in the District's financial statements and are explained in Note 1.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

3. TRANSACTIONS WITH THE COUNTY

Pursuant to an agreement between the District and the County, the County is responsible for providing all necessary employees to the District for purposes of performing District functions. Costs related to these employees are billed to the District based on actual time spent providing services to the District. Supply and equipment costs are also billed based on actual usage by the District. Accordingly, the District has no supplies inventory or employee-related liabilities (e.g., pension, compensated absences, and workers' compensation). For the year ended June 30, 2013, the County's billings to the District's General Fund approximated \$106,287,000. Costs associated with shared equipment and inventory funded through the Department of Public Works' Internal Service Fund are recorded in the District's financial statements as expenses under "Public Protection." For the year ended June 30, 2013, this expense from the District's General Fund was \$1,063,000.

The District has numerous transactions with the other funds of the County to finance operations, provide services, purchase assets, and apportion property taxes. To the extent that some transactions between the District and these funds were not paid or received by June 30, 2013, the net balances of interfund amounts receivable or payable were converted to cash for financial statement presentation.

On April 16, 1990, the District entered into a cost-sharing agreement with the County, relative to the Public Works headquarters building. Still in effect, the agreement provides for the County to make rental payments to the District in exchange for its occupancy of the building. Furthermore, the County agreed to pay for its proportionate share of the headquarters operating costs. For the year ended June 30, 2013, County rental payments to the District totaled \$4,141,000.

The District issued certificates of participation in 1987 to acquire its headquarters building. These certificates were defeased and replaced with refunding bonds in August 1993. The 1993 refunding bonds were refunded in January 2003 (see Note 6). The District's management has no intention of selling the headquarters building. However, in the event the headquarters were to be sold, the proceeds of the sale in excess of any outstanding indebtedness would be shared by the District and the County in proportion to each entity's share of the headquarters' cost.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

4. CASH AND INVESTMENTS

Pooled Cash and Investments

As provided for by the Government Code, some cash balances of the District are pooled and invested by the County Treasurer but are subject to withdrawal from the pool upon demand. As of June 30, 2013, the District's share of the total pooled cash and investments included in the Statement of Net Position and Balance Sheet under "pooled cash and investments" was \$254,270,000, which represents approximately 1.11% of the total pool. The "pooled cash and investments" reported on the Statement of Fiduciary Assets and Liabilities was \$179,000.

Interest earned on pooled investments is deposited monthly and is based upon the average daily deposit balance during the allocation period. Investment gains and losses are proportionately shared by the entities participating in the pool as an increase or reduction in interest earnings. The net unrealized loss on the District's proportionate share of investments held in the Treasurer's Pool was \$2,046,000 as of June 30, 2013. Statutes authorize the pool to invest in obligations of the United States Treasury, federal agencies, municipalities, commercial paper rated A-1 by Standard & Poor's Corporation or P-1 by Moody's Commercial Paper Record, bankers' acceptances, negotiable certificates of deposit, floating rate notes, repurchase agreements, and reverse repurchase agreements.

Investments are managed by the County Treasurer, who provides status reports on a monthly basis to the Board. In addition, Treasury investment activity is subject to an annual investment policy review, compliance oversight, quarterly financial reviews, and annual financial reporting.

GASB Statement No. 3 exempts participating entities from classifying their pool investments in categories of credit risk; however, GASB Statement No. 40 requires disclosures of common deposit and investment risks related to credit risks, concentration of credit risk, interest rate risk, and foreign currency risk. Information on common deposit and investment risks for the entire County Treasurer's Pool is presented in Note 5 to the County of Los Angeles Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2013.

Other Investments

Short-term investments of Milestone Treasury are managed by the Bank of New York Trust Company, N. A.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued

6. LONG-TERM OBLIGATIONS

Long-term obligations of the District consist of capital construction and refunding bonds and other liabilities (see Note 8).

Capital Construction and Refunding Bonds

On January 30, 2003, the Los Angeles County Public Works Financing Authority issued \$143,195,000 in refunding revenue bonds, maturing on various dates between 2004 and 2017, with an average interest rate of 3.34%. These bonds were issued to refund the outstanding principal amount of \$147,565,000 of capital construction and refunding bonds issued in 1993 at an interest rate of 5%.

The District's capital construction and refunding bonds outstanding at June 30, 2013, are summarized as follows (in thousands):

\$143,195 issued in 2003; due in annual installments through 2017; average interest at 3.34%	\$5,745
--	---------

Aggregate maturity of capital construction and refunding bonds as of June 30, 2013, are as follows (in thousands):

<u>Year Ending June 30,</u>	<u>Governmental Activities</u>	
	<u>Principal</u>	<u>Interest</u>
2014	\$ 1,355	\$ 235
2015	1,405	181
2016	1,465	125
2017	1,520	65
Total	<u>\$ 5,745</u>	<u>\$ 606</u>

Revenue Bonds Series 2005A

On July 13, 2005, the Los Angeles County Public Works Financing Authority issued \$20,540,000 in revenue bonds, maturing on various dates between 2006 and 2025, with interest rates ranging from 4% to 4.125%. Bond proceeds were used to finance the design, renovation, improvement, and seismic retrofitting of the District's headquarters building and to pay some costs of issuance incurred in connection with the Series 2005A Bonds. The District's revenue bonds outstanding at June 30, 2013, are summarized as follows (in thousands):

6. LONG-TERM OBLIGATIONS-Continued

\$20,540 issued in 2005; due in  
annual installments through 2025;  
interest at 4.0% to 4.125%

\$14,025

Aggregate maturity of revenue bonds as of June 30, 2013, is as follows (in thousands):

<u>Year Ending June 30,</u>	<u>Governmental Activities</u>	
	<u>Principal</u>	<u>Interest</u>
2014	\$ 935	\$ 566
2015	970	528
2016	1,010	489
2017	1,050	449
2018	1,090	407
2019-2023	6,150	1,344
2024-2025	2,820	175
Total	<u>\$ 14,025</u>	<u>\$ 3,958</u>

Changes in Long-Term Obligations

The following is a summary of long-term obligations for the fiscal year ended June 30, 2013 (in thousands):

	<u>Balance July 1, 2012</u>	<u>Additions</u>	<u>Deletions/ Maturities</u>	<u>Balance June 30, 2013</u>	<u>Due Within One Year</u>
Bonds Payable	\$37,195	\$ -	\$(17,425)	\$ 19,770	\$ 2,290
Other Liabilities (Note 8)	18,941	1,341	(167)	20,115	20,115
Total	<u>\$56,136</u>	<u>\$ 1,341</u>	<u>\$(17,592)</u>	<u>\$ 39,885</u>	<u>\$22,405</u>

7. INTERFUND TRANSACTIONS

Interfund transfers made during the year between the General, Debt Service, and Capital Project Funds were in accordance with long-term debt covenants. Interfund transfers to/from other funds for the year ended June 30, 2013, were as follows (in thousands):

<u>Transfer From</u>	<u>Transfer To</u>	<u>Amount</u>
General Fund	Debt Service Fund	\$19,088

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

8. RISK MANAGEMENT

The District is self-insured and has programs to address general liability. The District's properties are insured under the County's Consolidated Property Insurance Program, which has coverage of up to \$800 million for all risk including earthquakes, \$300 million for flood damages, and \$1 million for pollution cleanup. There were no settlements related to these programs that exceeded insurance coverage in the past three years. The District bears the risk for all loss exposure in excess of insurance coverage. Liabilities for claims are reported when it is probable that a loss has been incurred and the amount of the loss, including amounts incurred but not reported, can be reasonably estimated. The District utilizes actuarial studies, historical data, and individual claim reviews to estimate these liabilities.

As of June 30, 2013, the District's best estimate of these probable judgment liabilities is \$20,115,000. The changes in reported liability since July 1, 2010, were as follows (in thousands):

	Beginning of Fiscal Year Liability	Current Year Claims and Changes in Estimate	Claim Payments	Balance at Fiscal Year-End
2010-11	\$13,480	\$ 5,580	\$ (159)	\$18,901
2011-12	\$18,901	\$ 888	\$ (848)	\$18,941
2012-13	\$18,941	\$ 1,341	\$ (167)	\$20,115

9. PROPOSITION 218

In November 1996, voters approved the "Right to Vote on Taxes Act" (Proposition 218), which limits the District's ability to levy additional property-related benefit assessments without owner approval. In September 1998, the Board approved ordinance amendments to bring the County's general purpose taxes into conformance with Proposition 218. The District's existing benefit assessments are exempt under Proposition 218. However, any future increases to property-related benefit assessments may be subject to property owner approval.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

10. FEDERAL CLEAN WATER ACT

The Federal Clean Water Act (CWA) continues to have a significant impact on the District, although other funding sources, primarily the County of Los Angeles General Fund, have eased some of the impact. As a Permittee under the Los Angeles Municipal Stormwater NPDES Permit (Permit), which is mandated by the CWA, the District continues to:

- Implement programs to minimize urban and stormwater runoff pollution.
- Conduct water quality monitoring.
- Conduct scientific studies to better understand pollutant sources and the effectiveness of management practices.

The District continues to work with stakeholders to find successful and cost-effective solutions to comply with Total Maximum Daily Load (TMDL) regulations. In accordance with the CWA, the United States Environmental Protection Agency promulgates TMDLs to restore and protect the health of the nation's surface water bodies when existing pollution control programs do not attain water quality standards. A TMDL is simply defined as the amount of a pollutant that a water body can receive while meeting water quality standards. Over 30 TMDLs have been adopted in Los Angeles County since 2000. The District continues to collaborate with its municipal partners to keep pollutants out of the flood control system. At the direction of the County's Board of Supervisors, the District assessed the feasibility of a countywide Water Quality Funding Initiative that, if approved by voters, would have implemented a property-based storm drainage fee for clean water that can be leveraged to obtain Federal and State funding. However, at the conclusion of a public hearing for the proposed fee on March 12, 2013, the Board of Supervisors voted to not proceed with the fee at this time.

11. COMMITMENTS AND CONTINGENCIES

Propositions 1E - The Disaster Preparedness and Flood Prevention Bond Act of 2006 and 84 - The Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Bond Act of 2006

On November 7, 2006, voters approved infrastructure ballot measures for California State Propositions 1E and 84 which provide for the State to sell bonds to finance projects relating to enhancing flood protection and improving stormwater runoff quality. Both of these measures have potential to provide considerable funding to the District.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO THE BASIC FINANCIAL STATEMENTS-Continued  
JUNE 30, 2013

11. COMMITMENTS AND CONTINGENCIES-Continued

To date, the Flood Control District has won \$20 million in grant funding from Proposition 1E for its Santa Anita Dam Seismic Remediation and Spillway project, and the first round of funding for Proposition 84 has been completed, of which 25% of the funding was issued. Although the District received little funding from the first round, it expects to receive funding from the remaining 75%, which is expected to be issued over the next two years.

12. POLLUTION REMEDIATION

The District implemented GASB Statement No. 49 in the fiscal year ended June 30, 2009. GASB Statement No. 49 establishes accounting and reporting guidelines for the recognition and measurement of pollution remediation obligations (liabilities).

The District is involved in several remediation actions to clean up pollution sites within its boundaries. These matters generally coincide with the District's ownership of land, buildings and infrastructure assets. In some cases, regulatory agencies (e.g., California Regional Water Quality Control Board) notify the District of the need for remedial action. However, the District also conducts its own environmental monitoring to identify pollution sites and matters requiring further investigation and possible remediation. Once the District is aware of a condition, it begins monitoring, assessment, testing and/or cleanup activities, and recognizes pollution remediation obligations when estimates can reasonably be determined.

Previously identified types of pollution include leaking underground storage tanks, and contamination of water, groundwater and soil. Remediation efforts include remediation and feasibility studies, source identification studies, site testing, sampling and analysis, groundwater cleanup, and removal of underground storage tanks.

Underground storage tank projects were completed in Fiscal Year 2012-13 at Longden Yard, Santa Anita Dam, Pickens Yard, Irwindale Spreading Basin Headworks, Rio Hondo Spreading Grounds, San Gabriel Dam, and Big Dalton Dam. As of June 30, 2013, the District has no estimated pollution remediation obligations. In subsequent periods, the District will adjust estimated obligations when new information indicates such changes are required. At this time, the District has determined there are no estimated recoveries that would increase obligations.

13. SUBSEQUENT EVENTS

In preparing the accompanying financial statements, District management has reviewed all known events that have occurred after June 30, 2013, and through December 26, 2013, the date when this financial statement was available to be issued, for inclusion in the financial statement and footnotes.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

1. BUDGETARY DATA

In accordance with the provisions of Section 29000-29144 of the State's Government Code, commonly known as the County Budget Act, District budgets are adopted on or before October 2 of each year. Budgets are adopted for the General Fund and the Debt Service Fund on a basis of accounting which is different from generally accepted accounting principles (GAAP). For the fiscal year ended June 30, 2013, the District's Capital Project Funds were closed. Note 2 describe the differences between the budgetary basis of accounting and GAAP. A reconciling schedule is also presented for the General Fund.

The District budget is organized by budget unit and by expenditure object. Budget units are established at the discretion of the Board. Each individual fund constitutes a budget unit. Expenditures are controlled at the object level for all District budgets, except for capital asset expenditures, which are controlled on the sub-object level. Expenditures did not exceed the related appropriations within any fund as of June 30, 2013. The District is a blended component unit of the County of Los Angeles (County). The County prepares a separate budgetary document, the County Budget, which demonstrates legal compliance with budgetary control.

Transfers of appropriations between budget units must be approved by the Board. Supplemental appropriations financed by unanticipated revenue during the year must also be approved by the Board. Transfer of appropriation between objects of expenditure within the same budget unit must be approved by the Board or the Chief Executive Office, depending upon the amount transferred. The original and final budgets amounts are reported in the District's Schedule of Revenues, Expenditures, and Changes in Fund Balance – Budget and Actual on Budgetary Basis for the General Fund. Any excess of budgeted expenditures and other financing uses over revenue and other financing sources is financed by beginning available fund balance as provided for in the County Budget Act.

2. RECONCILIATION BETWEEN BUDGETARY BASIS AND U.S. GAAP

The District's Schedule of Revenues, Expenditures, and Changes in Fund Balance – Budget and Actual on Budgetary Basis for the General Fund has been prepared on the budgetary basis of accounting which is different from U.S. GAAP. The major areas of difference are as follows:

- Under the budgetary basis, designations are recorded as other financing uses at the time they are established. Although designations are not legal commitments, the District recognizes them as uses of budgetary fund balance. Designations subsequently cancelled or otherwise made available for appropriation are recorded as other financing sources.

LOS ANGELES COUNTY FLOOD CONTROL DISTRICT  
NOTES TO REQUIRED SUPPLEMENTARY INFORMATION-Continued

2. RECONCILIATION BETWEEN BUDGETARY BASIS AND U.S. GAAP-Continued

- Under the budgetary basis, encumbrances and other reserves are also recorded as other financing uses when established. For encumbrances, this occurs at the time contracts and/or purchase agreements are entered into. Under the U.S. GAAP basis, these obligations are only recognized when goods are received or services are rendered. Other reserves are also recognized as other financing uses to indicate that certain assets are not available for appropriation. Cancellations of encumbrances and other fund balance reserves are recorded as other financing sources for budgetary purposes.
- Under the budgetary basis, property tax revenues are recognized to the extent that they are collectible within one year after year-end. Under the U.S. GAAP basis, property tax revenues are recognized only to the extent that they are collectible within 60 days.
- Under the U.S. GAAP basis, investment income includes the effect of changes in the fair value of investment. Under the budgetary basis, investment income is recognized prior to the effect of such fair value changes.

The amounts presented for the governmental fund statements are based on the modified accrual basis of accounting and differ from the amounts presented on the budgetary basis of accounting. The following schedule is a reconciliation of the budgetary U.S. GAAP basis fund balances as of June 30, 2013 (in thousands):

	General Fund
Fund Balance – Budgetary Basis (page 43)	\$ 76,574

**Notes:**

- (1) This schedule represents the entire County of Los Angeles. The Flood Control District is a component of the County of Los Angeles and covers most of the County area.
- (2) Due to the 1978 passage of the property tax initiative Proposition 13 (Prop. 13), the County does not track the estimated actual value of all County properties. Under Prop. 13 property is assessed at the 1978 market value with an annual increase limited to the lesser of 2% or the CPI on property not involved in a change of ownership or properties that did not undergo new construction. Newly acquired property is assessed at its new market value (usually the purchase price) and the value of any new construction is added to the existing base value of a parcel. As a result, similar properties can have substantially different assessed values based on the date of purchase. Additionally, Prop. 13 limits the property tax rate to 1% of assessed value plus the rate necessary to fund local voter-approved bonds and special assessments.
- (3) Secured property is generally real property and is defined as land, mines, minerals, timber, and improvements such as buildings, structures, crops, trees, and vines.
- (4) Unsecured property is generally personal property including machinery, equipment, office tools, and supplies.
- (5) Unitary properties are railroads, utilities and pipelines crossing the County and are assessed by the State Board of Equalization and the County Assessor. Effective 2012-13, Unitary pipelines previously reported under Secured, is now reported under Unitary.
- (6) Exempt properties include numerous full and partial exclusions/exemptions provided by the State Constitution and the legislature that relieve certain taxpayers from the burden of paying property taxes.
- (7) Effective FY 2012-13, Secured property does not include the Unitary pipelines assessed by the County Assessor.

**Notes:**

- (1) The Secured Tax Rate and Ratios Report no longer includes the Detention Facilities and Flood Control Districts rates, as these bonds have matured.
- (A) The tax rate for Tax Rate Area #4, which applies to most property within the City of Los Angeles, is used to illustrate the breakdown of a tax rate within the County.
- (B) Article XIII A (Proposition 13) limits the maximum ad valorem tax rate to 1% of "full cash value" except for indebtedness approved by the voters prior to July 1, 1978. All other rates are calculated per \$100 of assessed value.
- (C) An exception to the 1% limit was provided by Proposition 46 that was approved in June 1986 re-establishing authority of local governments to issue general obligation bonds for certain purposes.
- (D) The County is divided into 12,229 tax rate areas which are unique combinations of various jurisdictions servicing a specific geographic area.

**Notes:**

- (1) Full-time equivalent count is calculated by dividing the total number of man-months paid by 12. Full-time equivalent employees includes all employees on the County's payroll system. This accounts for the difference between the total number of County employees on this schedule and the number of County employees per the "Principal Employers" schedule.
- (2) Specific data for Public Ways and Facilities is not available.
- (3) Beginning with 2009-10, total reflects the exclusion of Superior Court employees that are no longer on the County's payroll and are identified as State employees.
- (4) This schedule represents the entire County of Los Angeles. The Flood Control District is a component of the County of Los Angeles and covers most of the County area. Full-time equivalent County employees in the Flood Control District are reflected under the Public Protection Function/Program.

### Map of Los Angeles County Flood Control District

## Morris Dam Water Supply Enhancement Project

The \$10.6 million Morris Dam Water Supply Enhancement Project automated the dam and brought it into the 21st century. The project resulted in potential additional stormwater conservation and operational capabilities sufficient to supply water to 11,000 households per year. The dam's original technology was replaced by automated control systems; updated electrical, mechanical, and communication systems; a new control house; and five new high-performance valves.

## Rubber Dams at the San Gabriel Coastal Spreading Grounds

These rubber dams divert imported and reclaimed water to or from the spreading grounds, and are also used to spread water within the river bed itself. The rubber dams are a crucial component of Los Angeles County Flood Control District water recharge operations.

## **Santa Anita Dam and Reservoir Sediment Removal and Riser Modification Project**

330,000 cubic yards of sediment were removed to restore water storage capacity and reduce the risk of flood damage to downstream communities. A riser drain was also installed to ensure the dam's safety in the event of the maximum credible earthquake.

## San Dimas Dam Maintenance Project

Flood control gates were rehabilitated to ensure the longevity of San Dimas Dam's flood control operations.

The project also included the replacement of the left abutment monitoring platforms and the replacement of a five thousand gallon water tank.

December 28, 2013

To the Honorable Board of Supervisors  
County of Los Angeles, California

We have audited the financial statements of the Los Angeles County Flood Control District (District), a component unit of the County of Los Angeles, California, for the fiscal year ended June 30, 2013, and have issued our report thereon dated December 28, 2013. Professional standards require that we provide you with the information about our responsibilities under auditing standards generally accepted in the United States of America and *Government Auditing Standards*, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated October 24, 2013. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

*Qualitative Aspects of Accounting Practices*

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the District are described in Note 1 to the basic financial statements. As discussed in Note 2 of the notes to the basic financial statements, effective July 1, 2012, the District adopted four new accounting pronouncements during the fiscal year ended June 30, 2013. The new policies are Governmental Accounting Standards Board (GASB) Statements No. 60, 61, 62, and 63. Only GASB Statement No. 63 had an effect on the financial statements. See Note 1 for the effect on the financial statements. We noted no transactions entered into by the District during the fiscal year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were the claims liability and the estimated historical costs and useful lives of capital assets. Management's estimate of the claims liability is based on estimates from the District's legal department, while the estimated historical costs and useful lives of capital assets are based on historical data and industry guidelines. We evaluated the key factors and assumptions used to develop the estimates above in determining that they are reasonable in relation to the financial statements taken as a whole.

The financial statement disclosures are neutral, consistent, and clear.

*Difficulties Encountered in Performing the Audit*

We encountered no difficulties in dealing with management in performing and completing our audit.

*Corrected and Uncorrected Misstatements*

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. We noted no such misstatements during our audit.

*Disagreements with Management*

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

*Management Representations*

We have requested certain representations from management that are included in the management representation letter dated December 28, 2013.

*Management Consultations with Other Independent Accountants*

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the District's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

*Other Audit Findings or Issues*

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the District's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

*Other Matters*

With respect to the supplementary information accompanying the financial statements, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

This report is intended solely for the information and use of the County of Los Angeles Board of Supervisors and management of the Los Angeles County Flood Control District and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

*Moss, Levy & Hartzheim*

**Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance  
and Other Matters Based on an Audit of Financial Statements Performed  
In Accordance with *Government Auditing Standards***

To the Honorable Board of Supervisors  
County of Los Angeles, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, each major fund, and the fiduciary funds of the Los Angeles County Flood Control District (District) as of and for the fiscal year ended June 30, 2013, and have issued our report thereon dated December 28, 2013.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the District's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

*Moss, Levy & Hartzheim*

Moss, Levy & Hartzheim, LLP
